

Accurate cost estimations

Morphis Inspector is a free tool that collects statistical information about an Oracle Forms application providing considerably more accurate budget and time estimations before starting the migration project.

Once you have collected those statistics, you may send them to morphis sales team and get a report on the complexity of your forms application and the estimated code completion effort.

Assessment process

The assessment process consists of:

- ☒ Download and install the tool
- ☒ Perform code inspection
- ☒ Collect application data
- ☒ Send application data to morphis

Inspection details

The tool inspects each of your source Oracle Forms modules and extracts statistical data based on the number of components (e.g. blocks, items, canvases), triggers in use and types of PL/SQL statements used.

The result is a set of zip files containing XML files for each of the input modules. No business logic or data is extracted at this time. The zip files can be emailed to sales@morphis-tech.com for a free project assessment.

Assessment Steps

1. Please contact our sales department who will assist you on this process.
2. Sales team will provide you with the tool and you will be able to install it.
3. Run Morphis Inspector, ensuring you supply all the modules intended for migration.
For best results, place a copy of all FMB, MMB, PLL, RDF and OLB files inside a temporary folder, e.g. C:\oratmp, and add that folder to the FORMS_PATH registry entry, ensuring the files can be opened successfully. Then, run the tool over the files in that directory.
4. Send the resulting zip files to sales@morphis-tech.com
5. A Morphis account manager will contact you with the results.

Installation Requirements

- ☒ Microsoft .NET Framework 2.0;
- ☒ Microsoft Visual J# 2.0 Redistributable Package;
- ☒ Oracle Forms Builder, Oracle Reports Builder:
 - For Oracle Forms/Reports versions 4.5, 5, 6.0 and 6i: Oracle Forms/Reports 6.0.8.11.3;
 - For Oracle Forms/Reports 9i: Oracle Forms/Reports Builder 9.0.4.0.23/9.0.2.0.3 or superior;
 - For Oracle Forms/Reports 10g: Oracle Forms/Reports Builder 10.1.2.0.2 or superior;
- ☒ WinZip or any compatible compression tool.
